

HTML Review

Tags, Forms, Layout, Tag Settings

Agenda

- Tags
 - Structuring
 - To define content
 - To structure content
- Attribute
 - Global Attribute
 - Tag specific Attribute
 - Attribute for CSS
 - Attribute for JS
- Workshop: Let' try it!
- Questions

Learning Objectives

- What is a tag?
- How can be the tags grouped?
- What is a Form?
- What is a semantic tag?
- What is an attribute?
- How is the anatomy of an attribute?
- The most used attributes (class, id and others)

Document Object Model = DOM

Tag Rules

- Almost all tags have a closing tag, write them together
- use always lowercase
- HTML does not break the line (of text) by itself
- closing tags uses always forward slash "/" like `</p>`
- opening tags can contain attributes, but not the closing one!
- There is only one parent
- use appropriate tag for the job

Classification

What kind of tag groups are existing?

- Tags for Structure
- Tags for document content
- Tags for document layout
- Tags for Input, server communication

Tags For Structure

The envelope, the root of the document, parent structure.

Minimum acceptable/**valid** HTML structure

- **doctype**
- html
- head
- **title**
- body

Minimum HTML

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <title>title</title>
  </head>
  <body>
    <!-- page content -->
  </body>
</html>
```

HTML with CSS & JS

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <title>title</title>
    <link rel="stylesheet" href="style.css">
    <script src="script.js"></script>
  </head>
  <body>
    <!-- page content -->
  </body>
</html>
```

Tags for Content

How can one format the
content?

Think/treat it as a word document

- `<h1></h1>` (h2, h3, h4, h5, h6)
 - Element for defining **Headings**.
- `<p></p>`
 - Element for defining **Paragraphs**
- ``, ``
- `<i></i>`, ``
- `<a>`
 - Anchor
- ``
 - **Unordered List**, Element for defining an unstructured list
- ``
 - **Ordered List**, Element for defining an structured list
- ``
 - **List Item**, Element for defining a list
- ``, `<video>`

Tags for Content – I

Text formatting

- **Paragraph:** `<p></p>`
- **Bold:** ``, ``
- ***Italic:*** `<i></i>`, ``
- **Marked text:** `<mark></mark>`
- **TEST** Small text: `<small></small>`
- ~~**Deleted text:** ``~~
- **Inserted text:** `<ins></ins>`, `<u></u>`
- **TEST** Subscript text: ``
- **TEST** Superscript text: ``
- **New Line:** `
`

Paragraph:

This is at est paragraph. This is at est paragraph. This is at est paragraph. This is at est paragraph.

Bold Text: **Fetschrift mit dem Tag** ``

Important Text: **Fetschrift mit dem Tag** ``

Italic Text: *Kursiv Text mit dem Tag* `<i></i>` Emphasized Text: *Hervogehobenr Text* ``

Marked text: **Markierter Text mit dem Tag** `<mark></mark>`

Small text: Normaler Text mit kleinerem Text mit dem Tag `<small></small>`

Deleted text: ~~Gelöschter Text mit dem Tag~~ ``

Underlined Text: Unterstrichener Text mit dem Tag `<u></u>`

Inserted Text: Underlined Text mit dem Tag `<ins></ins>`

Subscript Text: Normaler Text _{und teifgestellter Text mit dem Tag} ``

Superscript Text: Normaler Text ^{und hochgestellter Text mit dem Tag} ``

Tags for Content – II

Text formatting

- **Links:** `Linkismi`
 - href is an **Attribute**
 - `Click to open the google`
- **Lists:**
 - Ordered List
 - ``
 - `List Item`
 - `List Item`
 - ``
 - Unordered List
 - ``
 - `List Item`
 - `List Item`
 - ``

A link (hyperlink)

[Click to open the google](#)

Ordered List

1. List Item 1
2. List Item 2

Unordered List

- List Item 1
- List Item 2

Tags for Content – III

Text formatting

- **pre:** Maintains original format
- **q:** Smaller, shorter quotations
- **blockquote:** Quotations from other sources
- **label:**
- **fieldset, legend:**
- **img:**
- **audio:**
- **video:**
- **embed:**

Tags for Communication with the Server

- form
- input
- textarea
- select
 - option
- button

Tags for Server Forms

- `<form></form>`
- `<input type="text" name="soyisim" value="club"/>`
 - type: text, number, email, file, color, search, date, checkbox, submit, button, image, password, hidden
- `<select></select>`
 - `<optgroup></optgroup>`
 - `<option></option>`
- `<textarea></textarea>`
- `<button></button>`

A collection of various HTML form elements:

- A simple text input field.
- A date input field with the placeholder text "dd . mm . yyyy".
- A color input field showing a black color swatch.
- A text input field.
- A text input field with the placeholder text "....".
- A file upload button labeled "Choose file" and the text "No file chosen".
- A checked checkbox.
- An unchecked radio button.
- An image input field showing a small image icon and the URL "http://www.psdgraphics.com/file/blank-price-tag.jpg".
- A submit button labeled "gönder".
- A dropdown menu with the text "Secenek 1.1" and a blue arrow icon.
- A text area.
- A button labeled "Bit Button".

EXAMPLE

Email address

Password

File input

 No file chosen

Example block-level help text here.

☐ Check me out

```
<form>
  <div class="form-group">
    <label for="exampleInputEmail1">Email address</label>
    <input type="email" class="form-control" id="exampleInputEmail1" placeholder="Email">
  </div>
  <div class="form-group">
    <label for="exampleInputPassword1">Password</label>
    <input type="password" class="form-control" id="exampleInputPassword1" placeholder="Password">
  </div>
  <div class="form-group">
    <label for="exampleInputFile">File input</label>
    <input type="file" id="exampleInputFile">
    <p class="help-block">Example block-level help text here.</p>
  </div>
  <div class="checkbox">
    <label>
      <input type="checkbox"> Check me out
    </label>
  </div>
  <button type="submit" class="btn btn-default">Submit</button>
</form>
```

HTML Form

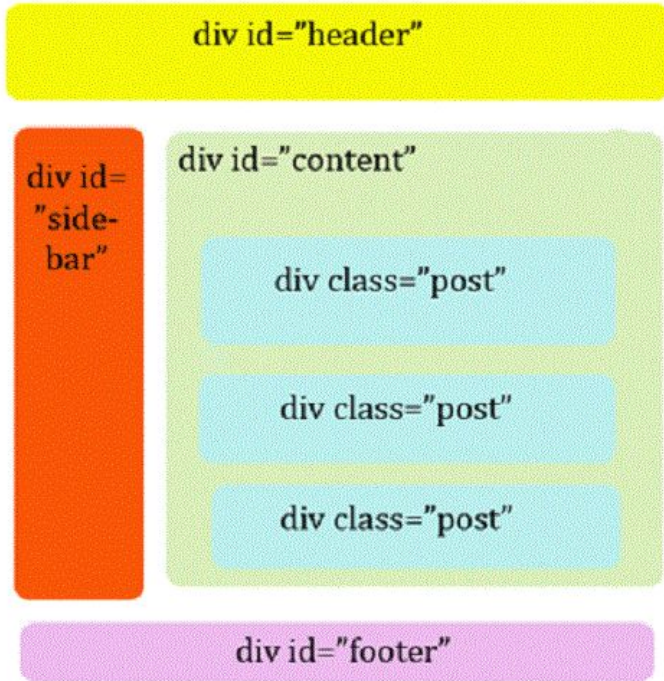

Tags for Content Structuring

Layout

Tags for Grouping

- *div (division)*
- *span*
- *fieldset*
- *form*
- `main`
- `header`
- `footer`
- `nav`
- `aside`
- `article`
- `section`
- `details, summary`

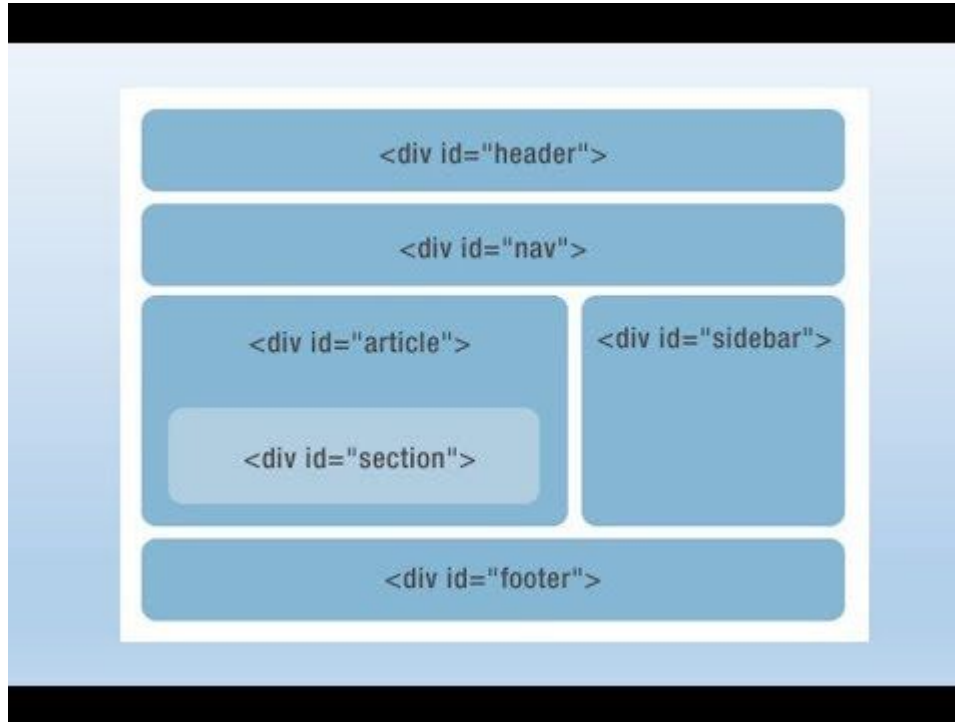

NON-Semantic HTML Tags

Semantic HTML Tags

Source: Hongkiat

let's try it

write it with divs convert it into semantic tags!

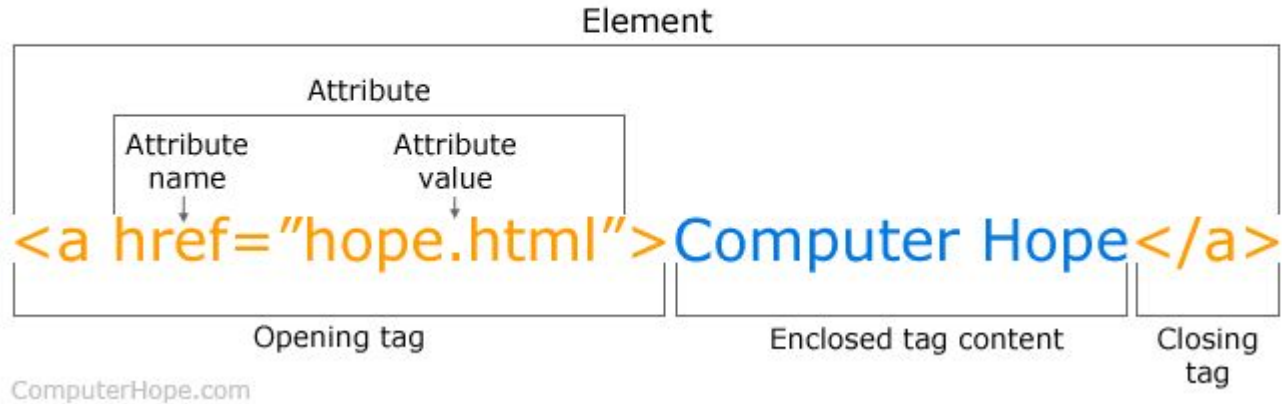

Attributes

Customize the Tag

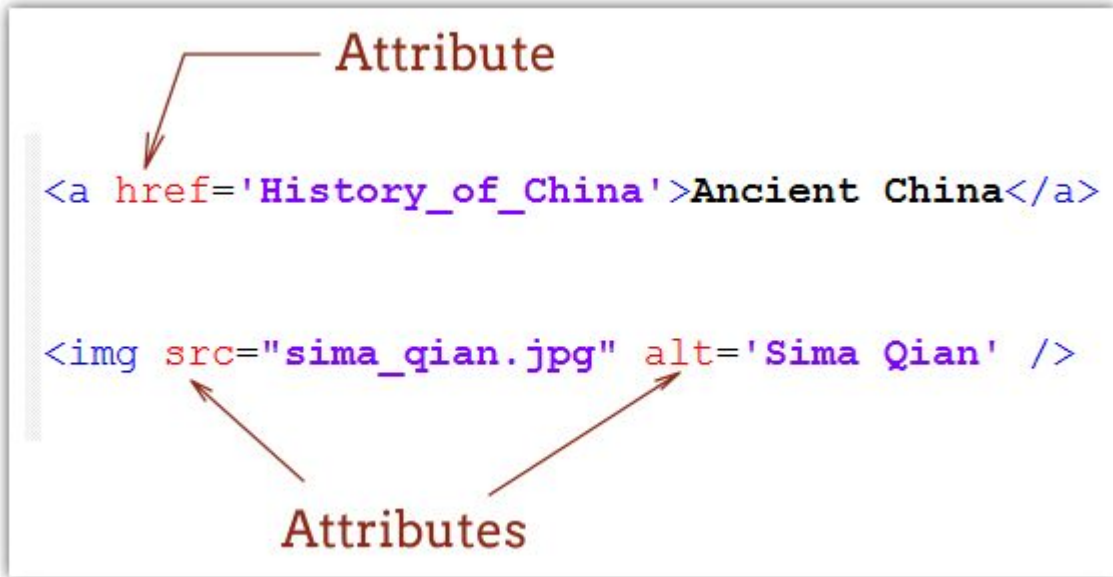

- Tags are commands
- Each tag has its default attribute values
- These values can be changed/adjusted.
- They change the behaviour of the tag.

Breakdown of an HTML Tag

Anatomy of an attribute

Anatomy of an attribute (more than one attr.)

href, src, alt

```

<TABLE border="1">
  <TR>
    <TD align="right">This is align right<br>This is align right</TD>
    <TD align="center">This is align center</TD>
    <TD valign="top">This is valign top</TD>
    <TD valign="bottom">This is valign bottom</TD>
    <TD>This is normal td</TD>
  </TR>
  <TR>
    <TD>This is normal td</TD>
    <TD colspan="2">This is colspan</TD>
    <TD rowspan="2">This is rowspan</TD>
    <TD>This is normal td</TD>
  </TR>
  <TR>
    <TD bgcolor="red">This is red td</TD>
    <TD>This is normal td, This is normal td</TD>
    <TD>This is normal td, This is normal td</TD>
    <TD>This is normal td</TD>
  </TR>
</TABLE>

```

Other examples

align, valign, bgcolor, colspan, rowspan

Attributes

Global Attribute

Applies to all HTML Tags
(Elements)

Often used

- **id**
- **class**
- **title**
- **style**
- **data-***
- hidden
- lang
- tabindex

Less used

- accesskey
- contenteditable
- contextmenu
- dir
- draggable
- dropzone
- itemid
- itemprop
- itemref
- itemscope
- itemtype
- spellcheck

Tag specific Attributes

More Information:

<https://developer.mozilla.org/en-US/docs/Web/HTML/Attributes>

- ``
 - sizes, srcset, height, width, crossorigin, ...
- `..`
 - download, ping, rel, type
- `<input type="tel" autofocus="true" autocomplete="off"/>`
 - pattern, placeholder, min, max, size, minlength, maxlength, name, readonly, required, spellcheck, value, ...
- `<button disabled="true" >...</button>`
- **audio**
 - loop, autoplay, muted, played, buffered, src, preload, volume, controls
- **meter**
 - min, max, low, high, optimum, value
- **progress**
 - max, value
- **form**
 - novalidate, target, action, method, enctype, autocomplete, accept-charset, ...
- **details**
 - open
- **textarea**
 - cols, rows, wrap
- **td**
 - colspan, rowspan, colspan, rowspan, align, ...

let's try it

Use some attributes in an HTML (10min).
